SKILLS

Bilingual: English/Spanish

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks/Libraries: React, Node.js, Expo, Tailwind

Tools: Git, Linux, Docker, GitHub Copilot, Vite, Command Line

Databases: MySQL, SQLite

EDUCATION

California State University, Monterey Bay, Seaside, CA May 2026
Bachelor of Science in Computer Science, Software Engineering GPA: 3.7/4.0
Dean's List for 3 semesters

Cabrillo College, Aptos, CA May 2024
Associate of Science in Liberal Arts, Math & Science

Relevant Coursework: Internet Programming, Operating Systems, Graphics Programming, Computer Architecture

RELATED EXPERIENCE

Full Stack Developer, VettyFilms, Seaside, CA Feb 2026 - May 2026

- Built 4 features for an in-development mobile/web marketplace app connecting filmmakers and clients, including a media upload for filmmaker profiles, using **TypeScript**, **Vite**, and **Tailwind**.
- Delivered 3 responsive frontend features, including a sticky button and dynamic UI text, improving usability while maintaining design consistency.
- Replaced a deprecated variable used in 5 files and safely removed the associated **PocketBase** database field, ensuring data integrity and improving codebase maintainability.
- Resolved 5+ UI issues on small-screen devices, including missing buttons and layout misalignments, ensuring a consistent user experience ahead of public release.

Software Engineering Intern, CTI / CodeDay June 2025 - Aug 2025

- Collaborated with a teammate to refactor Crawllee's codebase and fix misleading error messages using **TypeScript** and **Vitest**, improving developer experience for a library with 25k+ GitHub stars and 840k+ monthly downloads. ([Pull Request](#))
- Leveraged GitHub **Copilot** to efficiently navigate Crawllee's large codebase, reducing onboarding time and root cause analysis time.

Software Engineering Intern, CTI / CodeDay Jan 2025 - Feb 2025

- Implemented a test case for Open Energy Dashboard, validating energy data and ensuring accurate unit conversion using the **JavaScript** test framework, **Mocha**. ([Pull Request](#))

PROJECTS

Project Lead, Linktree-Style Website, Personal Project Jun 2026 - Jun 2026

- Built and deployed a personal [portfolio website](#) using **React**, **JavaScript**, **Vite**, and GitHub Pages, showcasing professional links in a clear Linktree-style design.
- Implemented per-entry buttons enabling users to copy links or download files directly, enhancing usability and accessibility of the portfolio.

Frontend Developer, SwapSmart, CSUMB, Seaside, CA Feb 2026 - May 2026

- Co-developed a mobile app from scratch with a team of four based on client requirements that surfaces sugar-free product alternatives using **React Native**, **Expo**, and **TypeScript**.
- Built 3 pages, including ratings and reviews, a favorites page, and debugged icon rendering issues on Android devices to ensure cross-platform consistency.

Backend Developer, Movie Browsing Website, CSUMB, Seaside, CA Nov 2024 - Dec 2024

- Co-developed a movie and TV show browsing website with a team of three using **JavaScript** and **Node.js**, enabling users to browse entries, search by title, and create watchlists.
- Integrated the TMDb API to retrieve and display movie and TV show metadata, including user ratings and trailers, from a catalog of 1M+ movies and 200k+ TV shows.
- Designed and queried a **MySQL** database to store and retrieve personalized user data, including watchlists and favorites.

Full Stack Developer, Otter Library System, CSUMB, Seaside, CA Nov 2024 - Dec 2024

- Developed an Android library system app in **Java** using **Android Studio**, implementing account creation and genre-based book browsing with **SQLite** local storage.
- Implemented an admin panel with activity log viewing and manual book entry, extending functionality beyond standard user features.

Project Lead, Arduino Countdown Timer, Cabrillo College, Aptos, CA Oct 2023 - Nov 2023

- Designed and built a user-adjustable countdown timer using an **Arduino**, two 7-segment displays, and a rotary encoder, featuring real-time updates, reset functionality, and a flashing expiration display.

Project Lead, Unscramble, Personal Project Jan 2022 - Jan 2022

- Designed and built a terminal-based word guessing game in **C++**, randomly selecting and scrambling from a bank of 370k+ words.

PROFESSIONAL DEVELOPMENT

Member, CTI Accelerate Sep 2024 - Present

Member, Tau Sigma National Honor Society Feb 2025 - Present

Member, CSUMB Data Science Club Jan 2025 - May 2025

Member, MESA, Cabrillo College Mar 2024 - May 2024
